Running a business has its challenges, especially when it comes to finding your "sweet spot" within your profit margins. We are normally taught to run a business and then figure out the profit later – only leaving us more frustrated in the end. What if you could identify your profit upfront and be able to run your business with minimal financial stress? In this workshop, you will learn:

- *It's OK to Identify Your Profit First*
- *Improve Cash Flow / Profitability with 5 Effective Strategies*
- *The Profit Assessment Tool is Your Best Friend*
- *Nuts & Bolts of a Cash Management System*

Workshops can be 1 or 2 days and customized to client specific needs.

*Jennifer's guidance and expertise in Goal setting and Planning are superb. Her passion for helping people create their vision with grace and ease created a genuine environment where everyone felt safe to share and express themselves. I learned tools that I can use in my speaking and coaching business along with my personal goals.*

*Jennifer's workshop taught me more about the things I thought I knew. Knowing the definition of a strategy is very different than creating your own and applying it! I was able to fill in the gaps that had been missing and holding me back. After taking this workshop, I feel much more organized and better able to generate and keep up momentum.*
